## Answer Sheet

Shade in the option corresponding to the question.

| 1 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 3 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 4 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 5 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 6 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 7 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 8 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 9 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 10 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 11 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 12 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 13 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 14 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 15 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 16 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 17 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |

| 18 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 19 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 20 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 21 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 22 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 23 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 24 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 25 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 26 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 27 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 28 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 29 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 30 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 31 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 32 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 33 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |
| 34 | $\mathbf{A}$ | $\mathbf{B}$ | $\mathbf{C}$ | $\mathbf{D}$ | $\mathbf{E}$ |

|  |  | number. The final digit, a '1' remains constant throughout. Therefore, the number denoted by the question mark is $73+7=$ 80 , add the " 1 " digit at the end, leading to 801. |
| :---: | :---: | :---: |
| 10 | C | The pattern is that the $3^{\text {rd }}$ number less the $1^{\text {st }}$ number in the row equals the $2^{\text {nd }}$ number. Therefore, 12 less $3=9$ |
| 11 | B | The second half of the trip would be the $4^{\text {th }}, 5^{\text {th }}$ and $6^{\text {th }}$ hour. At this point, with the decreasing rate of fish, they would catch: <br> $4^{\text {th }}$ hour $=6$ per hour <br> $5^{\text {th }}$ hour $=4$ per hour <br> $6^{\text {th }}$ hour $=2$ per hour. $6+4+2=12$ |
| 12 | A | 1.5 kilometres is $1 / 4$ of the full distance of 6 km . Therefore, $4 \times 30$ minutes $=120$ minutes. |
| 13 | A | 120 grams $/ 10$ grams $=12$, therefore 1 minute $\times 12=12$ minutes it takes to fully melt. <br> Distance rate $=1$ metre per 2 minutes. <br> If 12 minutes is all it takes for it to be fully melted, the distance is $12 / 2=6$, therefore 1 metre $\times 6=6$ metres. |
| 14 | E | Each digit should be considered separately. The pattern is that each digit is taken out and put to the back. At each point, that happens creating a new number. E.g. look at group 3, the ' 4 ' is taken and put at the back, therefore the new number is ' 93354 '. |
| 15 | A | The first digit of each group is a 'dummy' number so it remains constant. If you don't know what this means, download the ebook 'Reasoning to Reach for Exam Success'. The pattern is that each second digit is taken out and put to the back. At each point, that happens creating a new number. E.g. the $2^{\text {nd }}$ digit is taken out and pushed to the back and other numbers move forward. However, the first digit ' 2 ' remains as is and is unaffected. |
| 16 | C | The horizontally is the power of 2 . So 2 to the power of $2=4$ and 4 to the power of $2=16$. The same goes for the bottom row. The vertical column does not have any holding pattern. |
| 17 | E | The pattern is by column and it is first number +2 and then second number -4 to equal the third number. Therefore, $-12+2=-10,-10$ $-4=-14$. |
| 18 | C | The pattern is multiplying each number by 3 . Therefore, $18 \times 3=$ 54. |
| 19 | B | Each number is going up by an increased unit. E.g. $+1,+2,+3,+4$, +5 . The $5^{\text {th }}$ number is going up 4 units from 17 , so $17+4=21$ |

Violet: $4 \times 22=88$
Total cost $=118$, total quantity $=27$
Now take away total cost from big total of 286
$268-118=168$ is the total price paid for all ivy pots.
Now take away total pot quantity of Mondo and Violet from big total of 41 . $41-27=14$.

168 divided by 14 pots $=$ the price paid per pot $=\$ 12$

| 33 | D |
| :--- | :--- |
|  | In her third race after her fastest race, Queen Delight's time is <br> reduced by 6 seconds $(2 \times 3) .58$ seconds less 6 seconds is 52 <br> seconds. |
|  | 52 sec as a fraction of 58 secs through the process of simplification <br> is: <br> $52 / 58 \rightarrow 26 / 29$ |
| 34 | $\mathrm{E} \quad$Calculate the total square metres of each wall. $7 \times 10=70$ square <br> metres. Multiplied by 4 walls $=70 \times 4=280$ square metres <br> combined. <br> 280 square metres combined less $(4 \times 4$ for the windows $)$ and 10 <br> m2 for the door is: <br> $280-16-10=254$ |
|  |  |
|  | Time to calculate the paint needed. |
| That's $254 \times 2=508$ |  |
